Creating your own tape measure is quick, easy, and requires only 2 tools: tape and scissors. Step 1: Cut along the solid black lines outlining the measuring tape (you should have 9 separate strips). Step 2: Place the "Tape Here" portion at the end of each strip and cover half of the next number with the "Tape Here" and tape it down (ex: the "Tape Here" portion will cover half of the "10" between 9 and 10). Step 3: Repeat until the length measures nearly 7 feet!
